Alfin Noviaji

Full Stack Developer | Senior Frontend Developer

Malang, Indonesia | alpinnz@gmail.com | alpinnz.github.io
github.com/alpinnz | linkedin.com/in/alpinnz

Profile

Full Stack Developer based in Malang with experience across web, mobile, and backend development. Currently a Senior Frontend Developer at PT Ada Ide Langsung Jalan, building Smartlink products and contributing to Groapp. Previously led frontend delivery across multiple products. I focus on clear product workflows, maintainable architecture, API integration, and practical developer tooling.

Core skills

Frontend: TypeScript, React, Next.js, Vue, responsive UI, localization, API integration

Mobile: Flutter, Dart, Kotlin, React Native, cross-platform delivery, UI testing

Backend: Node.js, Go, Hono, PostgreSQL, MongoDB, authentication, Docker

Leadership: Technical planning, mentoring, code review, shared components and standards

Experience

Senior Frontend Developer

PT Ada Ide Langsung Jalan | Aug 2026 - Present

Develop Smartlink products as a Senior Frontend Developer, including web and mobile features, architecture, API integration, performance, and code quality. Contribute to Groapp modules such as Access and Accounting in collaboration with product and backend teams.

Frontend Engineer Lead

PT Ada Ide Langsung Jalan | Jan 2022 - Jul 2026

Led frontend delivery for Smartlink Owner, Smartlink Kasir, KasirMudah, Smartlink White Label, and Groapp modules across web and mobile. Planned work and team capacity, mentored engineers, reviewed code, and established reusable foundations and technical standards.

Full Stack Engineer (Freelance)

Independent | Jan 2020 - Present

Independent full-stack work across web and mobile applications alongside product engineering roles.

Back End Engineer

Stellarlab | Oct 2021 - Oct 2022

Developed backend features with Node.js and collaborated on implementation and technical learning.

Mobile Engineer

PT Ada Ide Langsung Jalan | Jun 2021 - Dec 2021

Built core Flutter features for Smartlink Kasir using modular code and domain-driven design principles.

Android Engineer

Gumcode | Mar 2021 - May 2021

Developed Android features for the CloseBuy property marketplace using MVVM.

Android Engineer

PT Aku Peduli Indonesia | Feb 2020 - Aug 2020

Contributed to IzzyResto, IzzyInventory, and Rema Android applications using Kotlin and Flutter.

System Administrator

Star Nt Game Center | Aug 2017 - Feb 2020

Maintained daily technical operations and an ERP application for products, finance, and employee scheduling.

Selected public work

Valfuse Node

TypeScript toolkit for forms, validation, localization, and code generation with React, Vue, and Express integrations.

https://github.com/alpinnz/valfuse-node

Flutter developer tools

Published localization_gen for typed translations and automation_keys_gen for consistent UI test identifiers.

https://github.com/alpinnz/localization_gen

Frontend HTML sanitization study

Compared React and Flutter sanitization with automated tests covering more than 60 XSS examples.

https://github.com/alpinnz/research-sanitazion-frontend

Education & certification

Bachelor of Computer Science, Institut Teknologi dan Bisnis ASIA (Oct 2017 - Feb 2021).

Microsoft Technology Associate: HTML5 Application Development Fundamentals.
